

Field Report

Customer / Project information Mrs Miskin, St Teath - Wetroom / Utility Flooring.

Project Overview

To Provide a non-slip, waterproof flooring to Wetroom, Utility & Hallway.

Industrial Customer

Andrew Bishop, (builder) St Kew.

Project Location

St Teath, Cornwall

Applicator

LINE-X Cornwall
T: +44 (0)1208 812312
E: info@linexcornwall.co.uk
W: www.linexcornwall.co.uk

Lining Formulation

LINE-X XS100, 100% Solids Polyurea Sprayed On Lining.

Lining Application System

Graco EXP2, Heated, High Pressure With Fusion Gun.

Substrate

Moisture Resistant Chipboard / Planed Timber & Plasterboard.

Field Report

Customer / Project information Mrs Miskin, St Teath - Wetroom / Utility Flooring.

Situation Overview:

Within a newly built extension the customer required a non-slip waterproof floor. The substrate was moisture resistant chipboard which created a floating floor, Traditional materials were not an option as the joints would crack under movement.

The Solution

With the room prepared, Grey LINE-X XS100 was sprayed to a minimal thickness of 3mm & a textured finish applied.

The results were outstanding. The LINE-X will flex & move with the floating floor therefore maintaining the waterproof barrier & the textured finish would ensure Mrs Miskins grandchildren or dogs shouldn't slip over. The coating will also enable them to hose the floor down should the need arise.

We were called back when the Wetroom was fully completed to view the finish for ourselves, the results of which can be seen below.

The builder commented on how much mess his plasterer had made while skimming the walls and just how easily the LINE-X cleaned up at the end of each day.
